

Cold night roost audit checklist

Check each item on paper. Mark fails and fix them before changing more variables.

- [] Stand at roost height after dark; feel for drafts.
- [] Check litter under roosts for wet clumps.
- [] Confirm high vents open and screened.
- [] Confirm morning water access plan.
- [] Confirm winter covers have no predator gaps.
- [] Confirm roosts are wide enough for the flock.

Tip: keep a dated note of what failed. Quiet weekly checks beat emergency weekends.
